Professional Profile

Entry-level software engineer with practical experience in full-stack application development, backend systems, databases, geospatial platforms, authentication, cloud hosting, deployment, and system troubleshooting. Passionate about building robust, scalable solutions and contributing to efficient software development lifecycles in professional environments.

Technical Skills

- **Programming Languages:** Java, TypeScript, JavaScript, Python, C#, C, SQL
- **Frontend Development:** React.js, TypeScript, JavaScript, Vite, HTML5, CSS3, Tailwind CSS, React Router
- **Backend and APIs:** Spring Boot, Spring Web, Spring Data JPA, Node.js, Express.js, FastAPI, REST APIs, .NET
- **Databases and GIS:** PostgreSQL, PostGIS, relational database design, SQL, Leaflet, React-Leaflet, Turf.js, shapefile handling, geospatial data processing
- **Security:** JWT authentication, Spring Security, role-based access control, multi-factor authentication, protected routes
- **Hosting, Cloud and Deployment:** Cloudflare Pages, Cloudflare DNS, Render, web application deployment, frontend and backend hosting, custom-domain configuration, DNS-record management, SSL/HTTPS configuration, environment-variable management, production builds, deployment troubleshooting, uptime monitoring, professional email-domain configuration
- **Development Tools and Testing:** Git, GitHub, Docker, Postman, JUnit, VS Code, Linux CLI, Flyway, PDFBox, debugging, technical documentation
- **Networking and Systems:** TCP/IP, DNS, DHCP, subnetting, routing and switching fundamentals, Windows Server fundamentals, system monitoring, troubleshooting

Professional Experience

Software Engineer — CODAFRIQA | December 2025–Present

- Designed, developed, and deployed a technology platform supporting the African technology ecosystem.
- Built responsive frontend interfaces using React, Vite, JavaScript, and TypeScript.
- Supported backend services, REST APIs, and PostgreSQL integration using Java and Spring Boot.
- Managed hosting, deployment, custom domains, DNS, and professional email configuration through Cloudflare, Render, and AOS.
- Monitored application availability, backend stability, and deployment performance while using Git and GitHub for version control.

Selected Projects

GeoSmart-Manager — AI-Integrated Geospatial ERP System | Final-Year Project, 2026

- Designed and developed a secure geospatial ERP system for land subdivision, surveying, and project-management workflows.
- Developed client, project, document, task, notification, reporting, and audit-management modules.
- Integrated interactive maps, parcel data, cadastral datasets, geospatial analysis, role-based access, and regulatory-compliance checks.

Volcano Art Center

- Implemented JWT authentication, Spring Security, PostgreSQL/PostGIS integration, and automated PDF reporting.
- **Technologies:** React, TypeScript, Vite, Tailwind CSS, Spring Boot, PostgreSQL, PostGIS, Leaflet, Turf.js, Python, FastAPI, Docker, GitHub, Postman, JUnit.
- Developed a modern web platform supporting experiences, talent applications, content, media, and shop-related services.
- Created responsive interfaces and administrative dashboards for content, applicant, media, and review workflows.
- Managed application hosting and deployment using Render.
- **Technologies:** React, TypeScript, JavaScript, Tailwind CSS, Render.

Restaurant Point-of-Sale System

- Developed a role-based restaurant-management platform for waiters, chefs, and managers including order management, kitchen order display, receipt generation, stock tracking, and performance reports.
- **Technologies:** React, TypeScript, Node.js, PostgreSQL, REST APIs.

Motel Booking and Hospitality Management System

- Developed a system for room reservations, events, restaurant, bar, sauna, and massage services with public and administrative interfaces.
- Implemented secure authentication and role-based access.
- **Technologies:** React, Vite, TypeScript, Tailwind CSS, Node.js, PostgreSQL.

Hospital Management System

- Developed patient-registration and medical-staff access-control features.
- Implemented role-based access for administrators, doctors, nurses, and reception staff, including multi-factor authentication.

Kitenge Bora E-Commerce Platform

- Developed a responsive e-commerce platform for African textiles with product browsing, order management, and database-driven functionality.
- **Technologies:** React, JavaScript, Java, PostgreSQL, HTML, CSS.

Education

Bachelor of Science in Software Engineering

Adventist University of Central Africa, Kigali, Rwanda | Completed 2026 — Awaiting Graduation

Languages

- Kinyarwanda — Native
- English — Fluent
- French — Intermediate
